	Urgent	Not Urgent
Important	**Do - (Your MVP)** ● Store tasks with their data in a file ● Read user input for new tasks ● Sort tasks that are added ● Print task list	**Schedule - (For V2.0+)** ● Enable users to input their own sorting criteria ● Basic GUI ● Make tasks hold more data such as point value, etc… ● Add ability for recurring tasks
Not Important	**Delegate - (Use a library)** ● Store and compare Dates ● Store a list of tasks with a variable size ● Read and Write Objects to and from Files for persistent storage	**Delete - (Cut it)** ● Store task list on a central server for cloud syncing across devices ● Create app that can be used rather than the terminal ● Add a notification system when tasks due dates are nearing
